PRESS RELEASE

WATER TOWER MAINTENANCE

June 20, 2013

At this time the Camden-Wyoming Sewer & Water Authority has begun performing maintenance on the water tank located behind the main office at 16 S West Street, Camden, Delaware.

During this scheduled maintenance, the water tank will be emptied and off line to complete interior maintenance which will include a washout and sterilization on the interior of the water tower. The outside of the water tank will also be washed and painted. While the water tank is off line you may experience periods of low water pressure and/or harmless discoloration of water until the inside tank maintenance is completed and approved by the State of Delaware Board of Health. This process may take approximately one month.

We apologize for any inconvenience this may cause however; this is an essential part of the required maintenance to prolong the life of the water tower. Do not hesitate to contact the office at 302/697-6372 if you should have any questions.

- Harold Scott Sr.
CWS&WA Superintendent
